**E-Prescribing** – defined as a physician’s ability to electronically send an accurate, error free, and understandable prescription directly to pharmacy. Congress has determined that the ability to electronically send prescriptions is an important element in improving the quality of patient care.

**Medication History Transactions** – Provides the physician with information about medications that the patient is already taking prescribed by any provider, to minimize the number of adverse drug events.

By signing this consent you are agreeing that Aventa can request and use the prescription medication history from other healthcare providers and/or third party pharmacy benefit payers for treatment purposes.
